Registered Valuation Analyst (RVA)

## INTRODUCTION

Nordic Institute for Registered Valuation Analysts (NIRVA) is the professional organisation for every Registered Valuation Analyst (RVA) in the Nordics.

## DESCRIPTION

A Registered Valuation Analyst or RVA is a financial expert who specializes in the determination of the economic value of a company, a specific asset or liability, or a combination of both assets and liabilities (i.e. a business). Although valuing companies is a relatively new discipline, it is becoming ever more commonplace to call in a RVA in different situations.

Only those registered by NIRVA may call themselves a RVA. A RVA has built up his or her knowledge and expertise by significant related work experience and by following a specialist postgraduate course in business valuation on how to perform the most complex valuation issues. The RVA remains up to date by following permanent education within the field.
